Projects and Contributions

Hugo

Top 15 contributors || Hugo
Hugo is a static HTML and CSS website generator written in Go. It is optimized for speed, easy use and configurability. Hugo takes a directory with content and templates and renders them into a full HTML website. Working on features mainly involving build, auto-expiration, site variables, and various build commands.

Cobalt UofT

2016 || cobalt.qas.im
Cobalt provides a collection of open data APIs that allow anyone to interface with public information from the University of Toronto in their applications or services.

CSSU

2016 || cssu.ca
Github Organization for the Computer Science Student Union at the University of Toronto. Main projects includes cssu.ca, CDF Scripts and other student run projects. Site maintenance, project management and code review of pull requests.

g3wanghc.github.io

2016 || g3wanghc.github.io
A really simple personal site hosted on GitHub Pages.

Experiences

President

2016 - 2017 || Computer Science Student Union || UofT
President of the CSSU, representing over 1200 Computer Science students who are either taking a Computer Science course or are part of a CS POSt at the University of Toronto St. George campus.

Student - Intern

Spring 2016 || Ontario Institute for Cancer Research || MaRS
Maintaining and creating internal tools for the IT Department. Managing Jira, Service Desk, Crowd and Confluence instances. Log correlation of system events, and creating policies for scheduled network scans.

Developer - Intern

Fall & Winter 2015 || ALM || Toronto
API sanitization, csrf token binding, features, bugs, e-mail blast and domain agnostics. Spot bonus award recipient for solving tricky bug on feature branch in time for scheduled release.
